主要经济园区 The Main Economic Parks

全省生产型产业主要布局在国家重点开发区域，具体落在省级重点产业园区。省级重点产业园区是海南未来主导产业发展的重要空间载体，按照“宜细不宜粗，宜精不宜多，宜实不宜泛”的原则，根据产业发展规划、资源和区位条件、结合建设现状，全省确定了六类24个省级重点产业园区。对于限制市县发展的产业，在省级相应的重点园区实施“飞地”政策。鼓励各市县、开发区因区位不同、资源环境制约、规划限制或产业配套等原因不能在本区域实施的项目（比如位于核心生态区的工业项目），落户到其他省级园区建设，通过制定飞出地、飞入地利益分享和投入分担的相关政策。

Productive industries in Hainan are mainly located in key national development areas, specifically in key provincial industrial parks which serve as the important spatial carriers of Hainan's future leading industries. In accordance with the principle of "more details rather than impreciseness, more fewer-but-better rather than more-but-futile, more practicality rather than unreality", and according to the planning of industrial development, resources and geographical conditions, combining with the current construction situation, Hainan has classified 24 key provincial-level industrial parks into six types. "Enclaves" Policy has been carried out in the corresponding key provincial parks with industries restricting the development of local cities and counties. By virtue of interests and input sharing related policies, projects (such as industries projects in core ecological areas) with poor implement conditions in development areas caused by different location, resource and environment restriction, planning constraint and weak supporting industries, can relocate to and be formulated in other provincial parks.
